

PARTNERSHIP

IT'S WHAT TURNS SERVICES INTO SOLUTIONS.

FRONTAGE CLINICAL RESEARCH AT A GLANCE

Frontage has over 20 years of experience in conducting early phase clinical trials.

STUDY TYPES

- First-in-Human
- Single and Multiple Dose Escalation
- Bioequivalence
- Absolute and Relative Bioavailability
- Drug-drug Interaction Studies
- Food and Alcohol Effect

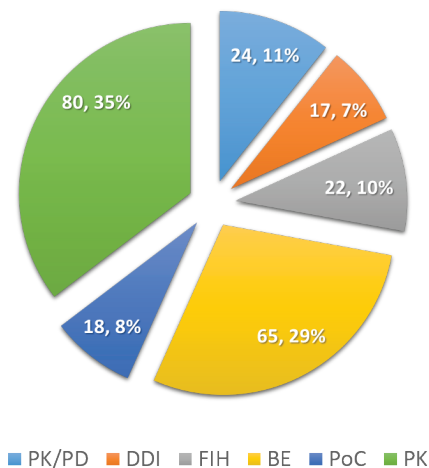

DOSING & DELIVERY FORMS

- Topical
- Oral
- Injectable
- Inhalation (MDI)
- Intranasal

THERAPEUTIC AREAS

- Cardiovascular
- CNS
- Dermatology
- Gastrointestinal
- Infections
- Inflammation
- Men's and Woman's Health
- Pain Management

Studies Completed in Last 6 Years Total - 226

SIX EARLY PHASE CLINICAL FACILITIES IN THE USA AND CHINA:

Experience with novel compounds and access to a diverse range of subject populations and patients

CLINICAL STUDY DESIGN AND EXECUTION: Early phase focus, monitoring and study management for multi-center studies (PK/PD)

DATA MANAGEMENT AND BIOMETRICS: EDC support & statistical programming, including e-Submission and CDISC support

MEDICAL WRITING AND REGULATORY SUPPORT: Clinical protocol development, Investigator's Brochures, CSR
